

# RAJ KUMAR RAI

FUTURE BUSINESS STUDENT

## AGE

---

19 years

## HOMETOWN

---

Khotang, Nepal

## LANGUAGES

---

English

Nepali

## ABOUT ME

---

I come from a family with four children. My father works as a day laborer, while my mother takes care of our household and family.

Education has always been highly valued in our family, even though our financial resources are limited.

## MY STORY

---

During my school years, I regularly helped in the family business alongside my studies. Through this experience, I learned at an early age what it means to take responsibility.

Many young people in my region leave school early because they need to support their families. I have been fortunate that my parents always encouraged me to continue my education and pursue my goals.

## MY GOAL

---

I would like to earn a bachelor's degree and later build my own business that creates jobs and opportunities in my home region.

## PERSONAL MESSAGE

---

Thank you for your interest in my story. I hope that one day I can share with you how your support has helped me grow, learn, and move closer to my goals. I would be grateful to get to know the person behind that support.
